

Manufacturing website — structure, page templates, and content checklist

A reference document covering the site's page structure, what each page needs to contain, and the information the business needs to supply before build.

Site map

1. Home
 2. Products (category listing → product detail)
 3. About / manufacturing
 4. Become a dealer
 5. Contact
-

1. Home

Purpose: first impression for cold traffic (Facebook ads, word of mouth). Establishes manufacturer credibility fast and routes visitors toward the right next step.

Sections, top to bottom:

- Header: logo, nav (Home / Products / About / Dealers / Contact), WhatsApp icon
 - Hero: headline naming the business as a manufacturer, subline with years in business, districts supplied, and production capacity; two buttons — "Enquire for dealership" and "Chat on WhatsApp"
 - Product category tiles (3 across): brushes, rollers, sandpaper, thinner, etc., each linking to that category's listing
 - Trust strip: factory photo + a short "why buy from us" list (own manufacturing, no middleman, consistent supply, bulk pricing, private label available)
 - Client / dealer logos or testimonials (3 slots)
 - Footer: address, phone, WhatsApp, GST number, link to download catalog PDF
-

2. Products — category listing

Purpose: browsable catalog for both retail shoppers and wholesale buyers.

Sections:

- Breadcrumb (Products > category name)
- Category filter row (brushes, rollers, sandpaper, thinner, ...)
- Product grid (3 across): photo, name, MOQ, "dealer rate on request"
- Footer strip: download full catalog PDF, bulk enquiry link

Per product (detail page, not yet mocked up): photo gallery, specs (size, material, pack size), MOQ, retail price (if shown) or "contact for dealer pricing", related products, "add to enquiry" or WhatsApp button.

3. About / manufacturing

Purpose: the credibility page. This is what turns a cold ad click into a warm lead — a trader's website can't replicate this page.

Sections:

- Two photos: factory exterior, production line
 - Three stat cards: years in manufacturing, monthly production capacity, districts currently supplied
 - Quality process strip: raw material check → production → QC inspection → packing → dispatch (photo strip)
 - GST/registration number, certifications (if any)
-

4. Become a dealer

Purpose: the qualifying lead-capture page that Facebook lead-gen ads should point to, so unqualified leads self-filter before a call.

Sections:

- Header line: direct-from-manufacturer pricing, bulk rates, private label available
 - Form fields: business/shop name, city/district, phone/WhatsApp number, approximate monthly volume, products interested in
 - Submit button
 - Secondary option: "or message directly on WhatsApp for a quick reply"
-

5. Contact

Purpose: every contact path in one place, plus proof of the 6-district coverage area.

Sections:

- Factory address, phone, WhatsApp business number, email, working hours
 - Map showing districts served
 - Two buttons: "Chat now" (WhatsApp), "Download catalog"
-

What the business needs to supply before build

Photos/video

- ☐ Factory exterior
- ☐ Production line / machinery in action

- ☐ Raw material storage
- ☐ QC / inspection step
- ☐ Packing and dispatch
- ☐ Individual product photos (clean background, per SKU)

Numbers and facts

- ☐ Year the business/factory started
- ☐ Monthly production capacity (units)
- ☐ List of districts currently supplied (confirm it's 6, and which ones)
- ☐ GST number
- ☐ Any certifications (ISO, BIS, etc.) — or confirm there are none yet
- ☐ MOQ per product category
- ☐ Wholesale vs retail pricing structure (even as ranges)

Content

- ☐ Product list with categories, specs, and pack sizes
- ☐ 3+ client/dealer names or testimonials (even informal quotes)
- ☐ WhatsApp Business number to link sitewide
- ☐ Physical address and working hours
- ☐ Confirmation on whether private-label/OEM is something to offer publicly yet

Decisions

- ☐ Whether retail pricing is shown openly on the site or gated like wholesale
- ☐ Whether the "Become a dealer" form or WhatsApp is the primary CTA for ads to point to
